# INTERNATIONAL SCIENCE AND CREATIVITY OLYMPIAD

Igniting the  
Innovative Self

[www.intellify.in](http://www.intellify.in)

## ABOUT US

International Science and Creativity Olympiad (ISCO) is started by Solve, an organisation formed by a dedicated team of current students and alumni of IIT Delhi. Intellify is the arm of Solve which manages and organises ISCO.

We all at various stages of our education, have realised the lack of platforms which motivate us to think out of the box and not limit our thinking to rote learning. We want to motivate the new generation to think beyond classroom studies and conquer new heights !

## MISSION

To ignite and grow creativity and passion for science and innovation among school students by providing them a platform not only to showcase their skills but a platform that will give them an opportunity to sharpen their skills further and will encourage them to think out of what is taught in schools and covered in books.

Other than the prizes for schools, we provide our product, "Solve" for free usage in all participating schools.

### Prizes for Winners of Round 3

#### First Prize

Laptop + Goodies worth 2 lakhs

#### Second Prize

Tablet + Goodies worth 1 Lakh

#### Third Prize

SmartPhone + Goodies worth 50k

**All students of every school will receive certificates and online study material from International Science and Creativity Olympiad.**

### Prizes for

### "Best Performing School"

#### First Prize

Goodies worth INR 25,000

#### Second Prize

Goodies worth INR 20,000

#### Third Prize

Goodies worth INR 15,000

## WHAT DO WE TEST?

The olympiad will measure students' General Intellectual Functioning and Creativity Quotient through a unique methodology we came up with which will enable us to measure the exact skills which the students need to develop to grow intellectually.

## HOW DO WE TEST?

The olympiad will take students through a series of well organised tests and a session which will determine the various components that form the bases of the intellectual functioning and innovation quotient.

Unlike other Olympiads, our exams will test not only test the knowledge of subjects but also the intellectual functioning of the students. Our exams use questions which are fusion of Science and Mathematical concepts along with various other skills.

## REGISTRATION FEE: 100

Schools can keep part of the fee as Organizational expenses for Round 1/2
